I went to Laura for a reflexology treatment and felt incredible. I was so relaxed and refreshed after and even better in the days that followed. She is very knowledgeable about our bodies and their energy. She also took the time to explain everything as she worked on my feet... Thank you Laura for all that you put into your work! — *Holly*

I recently had a reflexology appointment with Laura and was pleasantly surprised to notice that I experienced an immediate change in my posture. It has been remarkably better and I have been feeling much lighter and carrying my body better. We were not looking at a posture issue when we started the treatment but I guess the energy was put where it was needed. Thank you Laura! — *Dale*

I won a free hand reflexology treatment, my name was put in a draw when I signed up for the Miles of Smiles newsletter. It was so nice to have your hands massaged. Laura also used the OM tuning forks and did a smudging. It is always so relaxing to be in her space. This was my second time going to see her. The first time was for an amazing 90 minute R&R session where she does 45 minutes of reflexology on your feet along with a Reiki treatment, smudging, essential oils, crystal healing, and uses tuning forks, definitely a resting and relaxing experience. — *Julie*

Your name is fitting because that is how I'm greeted every time I walk in the door: with Miles of Smiles! It only took one session for me to become hooked. I enjoy everything, from the warm inviting atmosphere to the courteous professional sessions. You explain everything in a way that I comprehend. What Is Reflexology?

Reflexology is a massage technique of focused pressure directed to the feet. It is based on the theory that there are zones, or “reflexes,” on the foot which correspond to and are relative to all the body’s parts, glands, and organs, so stimulating specific locations on the feet provides the equivalent of a full-body massage.

When the reflexes are stimulated, the body’s natural electrical energy works along with the nervous and muscular systems to clear any blockages in the corresponding zones. Manipulating specific reflexes removes stress, activating a parasympathetic response to enable the blockages to be released by a physiological change in the body. With stress removed and circulation enhanced, the body is allowed to return to a state of homeostasis. Homeostasis is the automatic process that the body incorporates to bring it back to the “normal” state.

Reflexology has ancient origins and was found in many cultures, from China and India in the East to Egypt in the West. Dr. William Fitzgerald is credited with being the father of modern reflexology, which he termed “zone therapy.”

Reflexology sessions are for all ages, from newborns to the elderly. This form of foot massage can be applied in a relaxation style for a general tune-up, in a therapeutic style for a chronically ill body, or anything in between.

What is Reiki?

Reiki, an ancient form of energy healing, has been part of the wisdom in many cultures for thousands of years. The word comes from the roots *Rei*, meaning “Universal,” and *Qi* or *Chi*, meaning “Life Force Energy”. We are alive because *chi* flows through and around us. This can be blocked by the way we collect, filter, and transmit information on a mental, emotional, physical, and spiritual level. Reiki heals by flowing through the energy field and charging it with positive energy. It can be applied either by a light touch on the body, or above-the-body energy technique. A session increases one’s life force energy to bring the body back into balance, promoting a healthier lifestyle.

What to expect during a session

During a Reiki session you will lay on your back for optimal relaxation, your eyes closed, breathing deep. Life force energy will work within the aura along each of the energy centres to assist your body in releasing blockages, cleansing negative energy, and balancing the chakras. Reiki energy will be channeled with the focused intention to support and activate the body’s natural ability to heal itself. It is one of the subtlest methods of healing. Balancing the body’s energies promotes peace and harmony!

Treatment sessions are designed for individual client’s specific needs. Techniques and tools include smudging, tuning forks and crystals for chakra balancing and auric cleansing, essential oils, and soothing music, along with the Reflexology and Reiki Energy Healing.
